The REGO-FIX powRgrip® is an extremely precise, safe, and cost-effective Press-Fit system, perfect for your high-speed, high-performance cutting applications.

The system delivers superior run-out using a toolholder, versatile collet, and a compact bench-top hydraulic clamping unit.

The collet's built in set screw provides precise presetting, repeatable to less than 0.0004" (10µ).

Its slightly tapered shape, combined with the 9-ton tabletop clamping unit, deliver the highest clamping force on the market without dangerous heat or hazardous EMF radiation.

With a simple 10-second clamping cycle and a tool that's ready for immediate use without the need for cool-down, you can complete tool changes in less than 30 seconds

PGC hand pumps offer a price advantage over the PGU units while still performing the task of pressing in tools. The operator actuates the pressure by use of the lever arm until the desired pressure is reached.

Vibration Decay Chart

REGO-FIX® Xtended Length Toolholder with MFD™ technology.

Standard toolholder

This New **MICRO-FRICTION DAMPENING™ (MFD)** technology (pat. pending) from REGO-FIX allows the holders to dissipate vibrations faster than standard long reach holders. Dampening the vibrations faster means that your cutting tool, part and spindle will see less vibrations resulting in better surface finishes, longer tool life and less spindle wear.

Machining parameters have to be adapted to the gauge length of the Xtended Length Toolholders
